Alcotens Surface

PROPERTIES

Liquid ready-to-use disinfectant for surfaces

Actives agents:
1-propanol 35% + ethanol 25%

APPLICATIONS

Disinfection of small work surfaces and work equipment to fight bacteria, yeast and mould (excl. bacteria spores and mycobacteria).

Intended for professional use only for spaces destined for human residence (PT2), in the food & beverage industry and animal nutrition (PT4).

ADVANTAGES

- leaves no residue after use
- rinsing with water no longer necessary so highly suited for surfaces where rinsing is not possible or desired.
- completely biodegradable
- price/quality very favourable
